

Adjectives

To build up a **noun phrase** you can use **adjectives**, which tell you more about what a **noun** is like.

Here are some **adjectives** that say more about a text message.

recent, funny, short, weird

You can put them before the noun.

A **short, funny, weird** message.

Or you can put them after a verb, joining the last two with *and*.

The message was **short, funny, and weird**.

Now you can compare things.

Your message is **shorter** than mine.

My message is **more recent** than yours.
